Carbon dioxide emission (CO₂) during PV panels production process in SoliTek manufacturing facility

With this declaration it is declared that SoliTek manufacturing facility uses **only green energy** provided by roof top solar power plant and electrical energy supplied from grid to manufacture PV panels. Energy supplied by Enefit operator from grid is produced only by renewable energy.

During manufacturing process of SoliTek photovoltaic panels **0 kg of carbon dioxide (CO₂)** is released to the environment.

Certificate of green energy consumption is provided as annex 1 to this document.
